EMAIL: INFO@INFINIUMGLOBALRESEARCH.COM

What We Offer?

01 Syndicate Studies:

A large number of market reports differ industry verticals including food & beverages, chemicals, healthcare, construction and infrastructure, and information and communication technology, Automotive, Aerospace & Defence, Industry Automation

02 Consulting Services

Custom research, business consulting, new product launch strategies, SBU, Mergers and Acquisitions, Financial Analysis and others.

03 Database services:

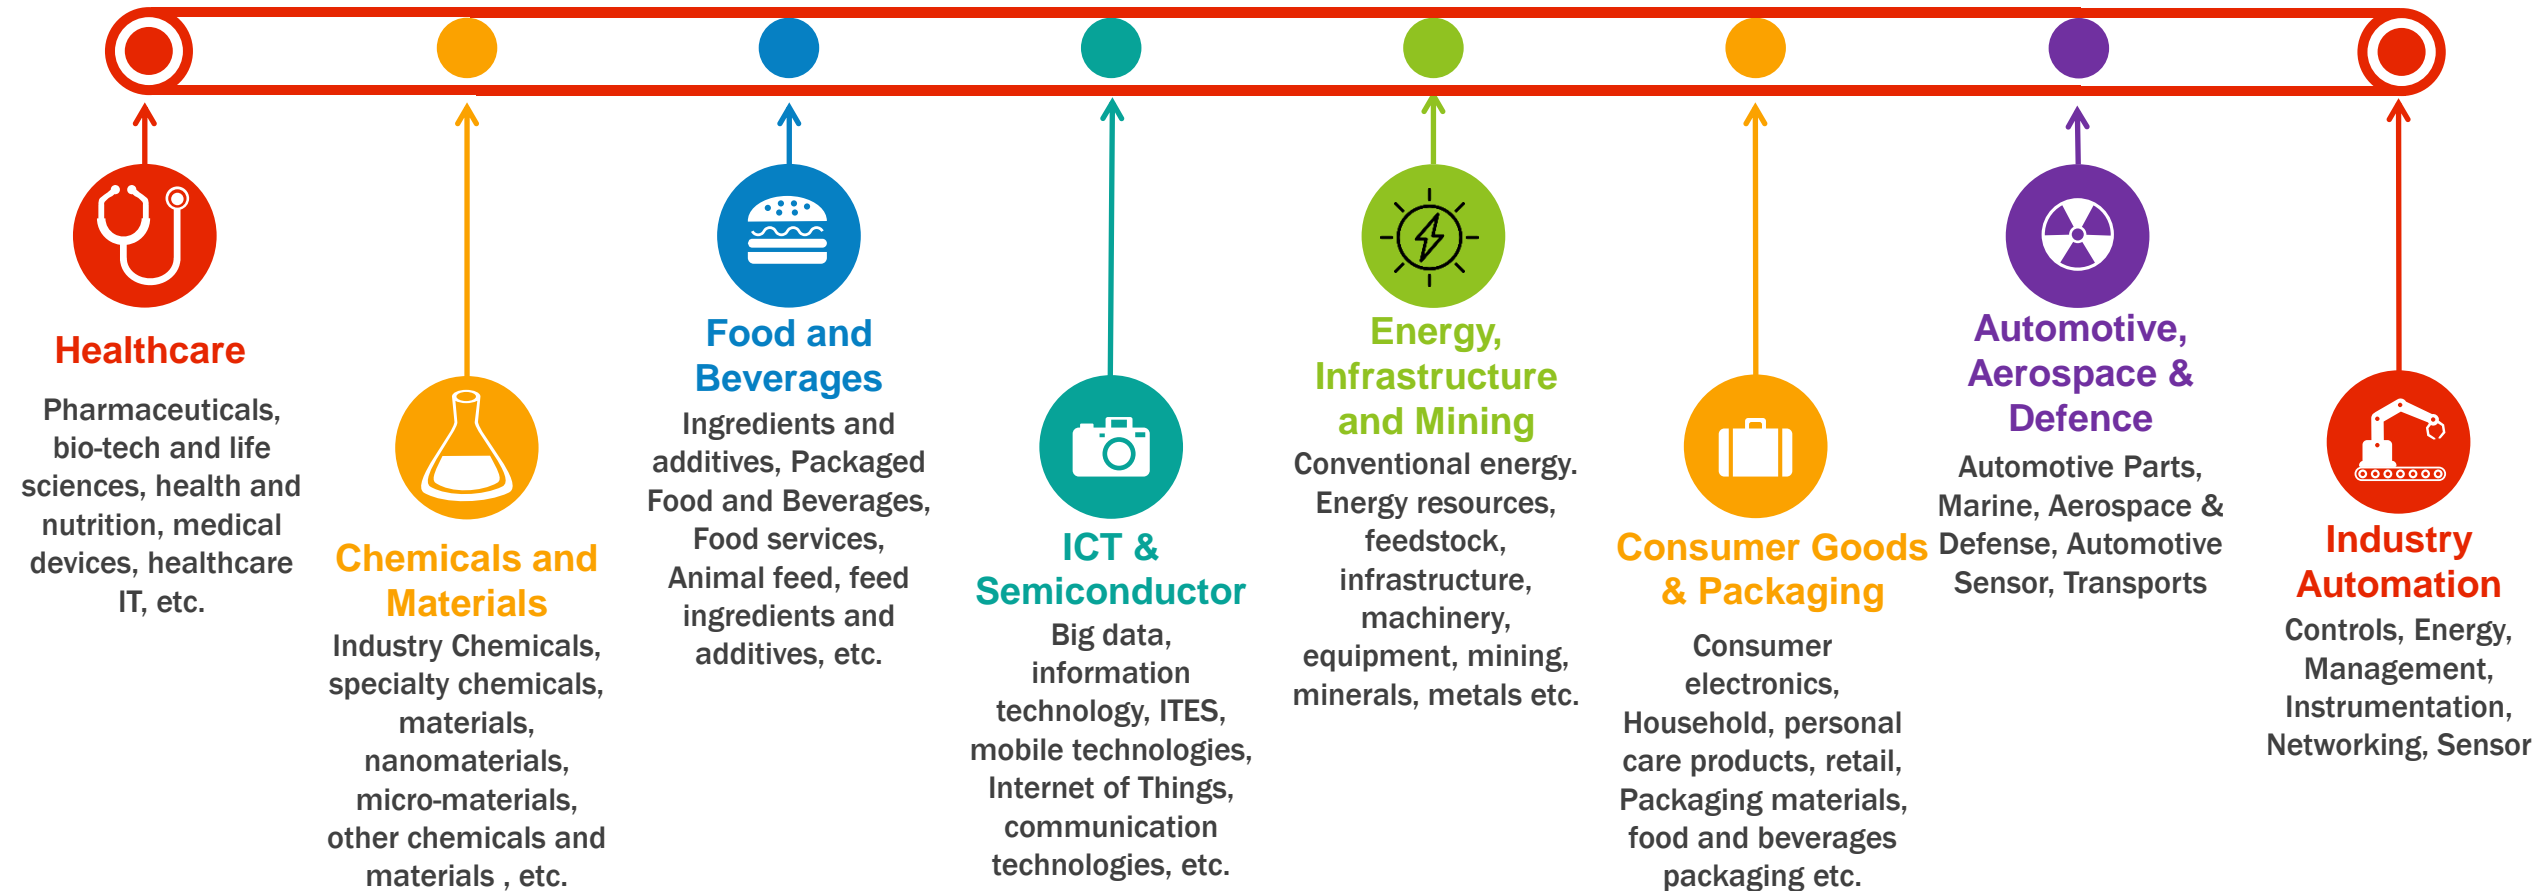

Database management, industry data, exclusive data in excel format, business directory solutions

04 How can we assist you?

Our reports typically help you in following areas

- ❖ Corporate Strategy Planning
- ❖ Consumer Insights
- ❖ Competition Analysis and Strategies
- ❖ Product and Brand Management,
- ❖ Channel and Supplier Relationships

Our Expertise

Our Research Methodology

Introduction

Infinium Global Research offers its clients analysis based on extensive primary research which considers factual inputs of the experts in the industry including consultants, opinion leaders, and executives representing the leading companies in the aerogel market. Our in-house industry experts and SMEs are instrumental in developing the models that are apt to satisfy the research and business intelligence needs of our clients. We ensure consistent, and robust data analysis that will aid strategic decision making.

Research Approaches

- The studies carried out by Infinium Global Research provide deep insights into the trends and opportunities in the world market for the forecast period 2019 to 2025. Moreover, the market estimates are provided in terms of revenue in USD million. Furthermore, the research covers the analysis of various segments in the market under study. The estimates in the market study carried out by Infinium Global Research are based on both bottom-up and top-down approaches. In the bottom-up approach the revenues of the key players are determined and added to arrive at the country or regional markets size. The country market sizes added to arrive at the regional market size. Further, the market size of the regions is added to arrive at the global market size of product being researched.
- In the top-down approach the global market size of product under study is estimated based on the secondary research and historic data. Using this approach the regional market size is obtained by splitting the global number by percentage share of each regions such as North America, Europe, Asia-Pacific, and RoW. The regional market is then divided as per the market share of sub-segments of the product under study

Primary and Secondary Research

PRIMARY RESEARCH

Primary source of the information and data include

- ✓ Industry Experts/consultants
- ✓ Top level executives in the key market players
- ✓ Subject matter experts
- ✓ Academicians and research scholars

SECONDARY RESEARCH

Secondary sources of the information and data include

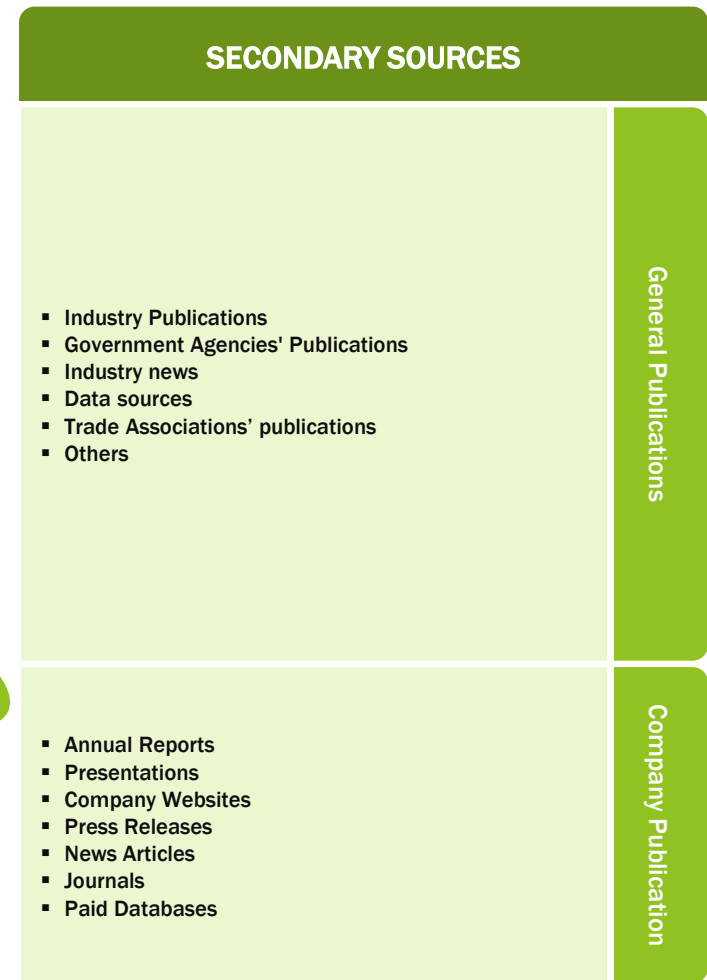

- ✓ Company annual reports
- ✓ Government/institutional publications
- ✓ Trade and associations journals
- ✓ Databases
- ✓ Websites and publications by research agencies
- ✓ Others

Determining the Market Size of Product Under Study

- The market size of product under study is determined based on the top down approach. The market size is validated using primary interview with the participants working in some of the leading players in the product under study market. The primary interview participants typically includes managers and CXO level executives of the leading players in this market.
- The primary interviews not only help identify the market size of the product under study market but also identify the factors that promote the growth in the market and the factors that restrain the growth in this market. The views of primary respondents were reconciled to provide qualitative analysis of the product under study market.
- The primary respondents also help identifying top 5-10 players and their possible market share in the respective country markets and in world market.
- The bottom-up approach is used to validate the global market size of product under study. With the help of primary interviews and secondary research the market size of product under study is determined for each country studied, which then is added to arrive at regional market size and thereby obtaining global market size. This in turn helps us to validate the market size of product under study in the world market.

DATA TRIANGULATION & INFORMATION SOURCES

Quality Check and Assessment Procedure Followed for Market Research

Editorial Review

- Adherence to style guides
- Consistency
- Progress against milestones

Senior Level Review

- Adherence to scope and client requirements
- Quality standards
- Progress against milestones

Compliance check with Infinium's quality standards

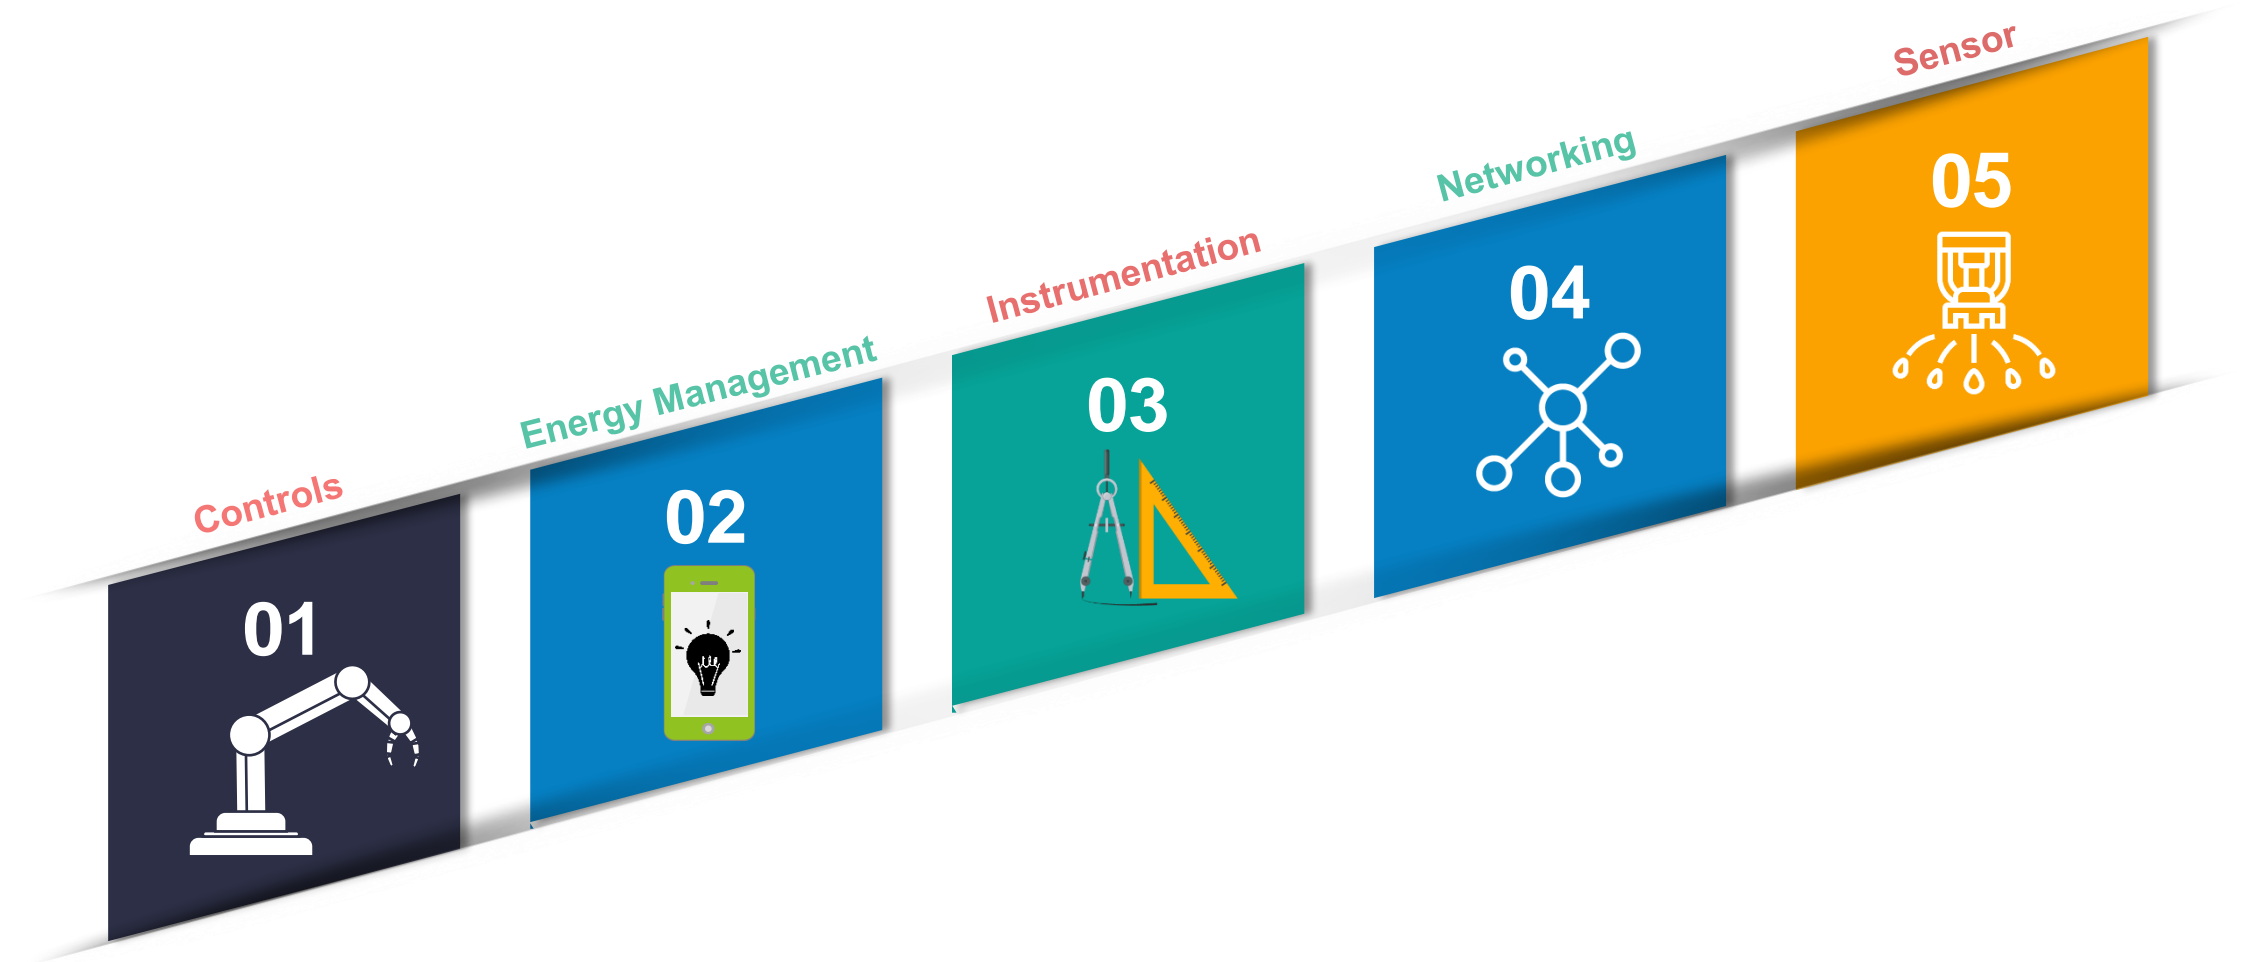

- Data accuracy
- Analytical guidelines
- Presentation guidelines
- Client specific guidelines

Validation with External and primary

- Analytical depth
- Sector understanding
- Overall business case / analysis theme
